PUNCTUATION

At last, it was time for PE with Mr Flower. Carey and Winston stood with the rest of the class doing stretching exercises. Then they did a bit of slow jogging on the spot, before Mr Flower sent them to run around the oval. PE usually started like this, but nobody, not even Carey, could ever estimate what they would do next. Mr Flower was the most unpredictable teacher at the school.

'Maybe he never knows himself what we're going to do next,' suggested Carey, when they were halfway around the oval.

'Maybe,' agreed Winston, between puffs.

PUNCTUATION

Then Carey got a little bit ahead of Winston. He wanted to stay beside him, because they were friends, but he couldn't

help running as fast as possible. He finished first and wasn't even puffing. Mr Flower was sitting on the bench at the edge of the oval patting the school dog, Dipper.

'Good on ya, mate,' he said, as Carey ran up to him. 'Now see what you can do with this while we wait for the others to finish.'

GRAMMAR

I **snap** the phone shut, run down to the water's edge and **throw** the mobile in one perfect, curving arc right out into the sea. It **glints** silver as it breaks the surface with a splash, then **sinks** without trace.

I turn away, furious, marching along the shore, but within minutes I trip, **scrambling** over a knot of gnarled tree roots, falling heavily. I've **torn** one of the ribbon ties on my sandal, and a hot, burning pain **shoots** through my left ankle. My eyes **prickle** with tears of anger, but I won't cry. I never cry - not since Dad **left**, anyhow. It'd be like letting him see how much he **hurt** me. Crying is for kids. I scream instead, a bloodcurdling yell that **startles** the birds and shakes the treetops before tailing off to a whimper.

I pull off my wedge heels and fling them away into the trees ahead of me, because they **have** ripped my feet to shreds and I don't care if I never **see** them again as long as I live.

PUNCTUATION

Carey was surprised to be handed a football, but he ran up and down, bouncing and catching it, just like he'd seen them do on telly. Then he thought perhaps he'd kick a goal, seeing as he was near the goalposts. So he held the footy with both hands, and angled it a little towards the

ground. He looked at the gap between the posts, then at the ball, took a bit of a run up and kicked. He watched as the ball sailed in a beautiful parabola, straight through the centre of the goalposts. Then he ran to get the ball back to see if he could do it again, but before he had time to kick it he heard Mr Flower's whistle. 'Find a partner,' he yelled, 'and handball to each other, like this . . . no, not like that Derek. That's a flick pass. No open-handers and no throwing the ball.'

PUNCTUATION

'Does Frank's mother know we are coming to look at these puppies?' mum asked, breaking her way into my most anxious thoughts.

Why do mums always worry about other mums knowing whether you are coming round or not? Molly's mum, Mrs Cook, is always happy to see me whenever I turn up as she says, 'It's nice to see you girls playing together,' and she always gives us flapjacks with apricots in, which she knows are my favourite.

I just shrugged and said, 'Frank said to come round.'

Mum sighed and muttered something about getting this over and done with.

PUNCTUATION

'Would you mind?' said someone behind her.

'What? Oh...sorry.' She let the token fall through the slot. She pushed against the steel bar and into the space of the music. There was another pause between trains, a few bars, a stringed instrument, clearly, but also a tenor voice. Was it a cello that the singer was playing? Surely not. No street musician would cart such a large and unwieldy instrument down into the bowels of the city, onto the trains, among the crowds; but the sound seemed too soft for a violin, too husky, too throaty. She could feel the music graphing itself against her skin, her body calculating the frequencies and intervals of the whole subway symphony: base throb of trains, tenor voice, soft lament of the strings, a pleasing ratio of vibrations. Mathematical perfection made her weak at the knees.
